

20cm Length Folding Machine

This folding machine is special designing for 20cm length wet nonwoven production. It adopt frequency conversion control, infrared counter, running stably and quickly. It is collocated the tensile force adjustor and pneumatic device.

Table-board is stainless steel material. Whole machine is nice-looking. Circuitry is canonical and logical that it is safe for operation.

FOLDING MACHINERY

**Applications :**

- Wet Tissue
- Hand wipe, face wipe
- Spunlace nonwoven

Features:

- Frequency conversion control, operate easily and conveniently
- Infrared counter, the amount of product can precision tracking.
- Tensile force adjustor
- Pneumatic device, predigest the operation and control easily and convenient.
- Stainless steel table-board, the finished product is sanitary and the machine can have a long lifecycle.

Technical parameter

Items	Unit	RFM-200
Unfolding size	cm	20cm(+_5mm)
Folding size	cm	20cm~80cm(+_5mm)
Product Speed	/	250-300 pcs/min
Power	kw	3.5kw
Available material	cm	spunlace, airlaid, thermalbonded nonwoven
Machine Weigh	kg	1500kg
Machine Dimension	cm	3800cm*1000cm*1500cm
