60cm Length Folding Machine

This folding machine is special designing for 60cm length wet nonwoven production. It adopt frequency conversion control, infrared countings, running stably at high speed .Ir is collocated the tensile force adjustor and pneumatic device.High grade bearing and more stainless steel materai.

It can add more function machine to fit the requirement of clients such as folding adjusting,knurling and printing machine and embossing machine.whole machine is nice-looking. Circuitry is canonical and logical that it is safe for operation.

FOLDING MACHINERY

Applications :

- House use wipe,
- Office use wipe
- Industrial wipe

Features:

- Frequency conversion control, operate easily and conveniently
- Infrared counter, the amount of product can precision tracking.
- Tensile force adjustor
- Pneumatic device,predigest the operation and control easily and convenient.
- Stainless steel table-board, the finished product is sanitary and the machine can have a long lifecycle.

Technical parameter

| Items              | Unit | RFM-600                                   |
|--------------------|------|-------------------------------------------|
| Unfolding size     | cm   | 60cm(+_5mm)                               |
| Folding size       | cm   | 20cm~80cm(+_5mm)                          |
| Product Speed      | /    | 200-550 pcs/min                           |
| Power              | kw   | 3.5-6.5kw                                 |
| Available material | cm   | spunlace, airlaid, thermalbonded nonwoven |
| Machine Weigh      | kg   | 2600kg                                    |
| Machine Dimension  | cm   | 5500cm*1100cm*1800cm                      |
