Full Automatical spraying Machine

This machine is used for liquid spraying of wet tissue with multi-specifications.It is equipped with fitting for liquid circumfluence and adjusts the humidity of the product sprayed freely. Directions and flux of the spraying can be changed by the user. It can even spray to many directions at the same time.

It adopts the transducer,lenthen the conveyer belt,and is equipped the mechanical continuous tension adjusting fitting. It is made of stainless steel and has the characteristics of convenient operation,high output,equal spraying, according with the sanitary standards.

WETTING MACHINE

Applications :

- Wet tissue
- nonwoven
- airlaid nonwoven

Features:

- Equipped with fitting for liquid circumfluence
- Can even spray to many directions at the same time
- Adopts the transducer,
- Equipped the mechanical continuous tension adjusting fitting
- Lenthen the conveyer belt
- Convenient operation,high output,
- Equal spraying, sanitary

Technical parameter

| Items                  | Unit | RWM-100            |
|------------------------|------|--------------------|
| Power supply           | v    | 380V 50HZ 3phase   |
| Electric power         | kw   | 3.5kw              |
| Raw material           | /    | Nonwoven fabric    |
| Weight of raw material | gsm  | 40-80              |
| Production speed       | /min | 5-15 meters/minute |
| Machine size(L*W*H)    | mm   | 3600*750*1500      |
| Device Weight          | kg   | approx. 1900 kg    |
