## Hydraulic Pressure Material Punching Machine

This machine drive by hydraulic pressure motor, can punch varies nonwoven materials, leather, fiber, cotton textile, rubber and other similar materials into you wanted shape. We apply the importing technology from UK United machinery Co., Ltd, which ensure the machine has the features of flexible, laborsaving, power saving and quiet that suits for punching

HYDRAULIC PRESSURE MATERIAL PUNCHING MACHINE

### Applications :

- Nonwoven fabric
- Food, medicine, native products
- Electric component, works, shops and service industrial

### Features:

- The available truncation force is 200KN
- The available working arm length is 350mm which can meet varies requirements in production.
- Applying automatic lubricate system which can reduce abrasion and prolong service life.
- The safety circuit controlling system can limit stoke automatically to protect the operator efficient.
- The handwheel can easily adjust the position between working arm and working table

## Technical parameter

Items	Unit	RWM-200
Punching force	v	200 KN
Punching plate size	kw	350??50mm
Available punching range	/	5-75mm
Pouching speed	gsm	0.10m/s
Base working table size	/min	1000??00mm
Power	mm	1.5KW
Device Weight	kg	approx. 1900 kg
