Towel Folding machine

Nonwoven folding machine is special designing for folding varies nonwoven towels, fresh wipes, table cloth, dinner cloth, kitchen wipes etc, which suits for varies size and material. The normal production speed is up to 120pcs per minute. The machine can be equipped with single color printing or logo, simple design printing device.

FOLDING MACHINERY

Applications :

- Spunlace nonwoven
- Airlaid nonwoven
- Thermalbonded nonwoven

Features:

- Automatic pneumatic device counting products number
- Frequency conversion motor, less power consume
- Obverse jumbo roll and reverse jumbo roll are both available on this machine
- Use the mirror type stainless steel to make the key part and the folding channels
- There are both nonwoven tension adjusting sets on the folding cylinder and feeding wheel to prevent the folding towels from uncontrol folding or losing position.

Technical parameter

Items	Unit	RFM-700
Folding size in length	cm	70cm(+_5mm)
Folding size in width	cm	20cm~80cm(+_5mm)
Folding method	/	“V” , “N” , “M” etc
Available fabric weight	gsm	40-80cm
Available material	cm	spunlace, airlaid, thermalbonded nonwoven
Jumbo roll dimension	cm	20-80cm width, <80cm diameter
Average production output	psc	100meter per munite
Towel folding error	mm	120pcs per munite
Power consume	kw	2mm of the both folding side
Machine dimension	m	3.5~6.5kw/3phase/380V
Weight	kg	L5.6mX W1.3m X H1.85m
